

PNR-05500 INSTALLATION INSTRUCTIONS

- Note:**
1. Disconnect the mains before installation.
 2. When adjusting the length of the light lines between the walls an expansion coefficient of 24×10^{-6} (2.4 mm per 100 m per °C) should be taken into account.
 3. Perspiration from hands can leave marks on the aluminium profiles and mirrors, which can be difficult to remove. Take appropriate precautions: wear gloves.
 4. 7-pin electrical connectors are suitable for solid wiring with a connection diameter of 1.5 – 2.5 mm².

Installation instructions Veko Light line PNR-05500

IP54 version with end and mid-span power feed KVN-N24 and MV-54-05500-30 respectively.

Light line must hang straight and in line

Mirrors or reflectors by 2 suspension points or, **at full capacity, by 3 suspension points**
